Education

Portland State University, Honors College

Portland, OR

B.S. in Computer Science

Sept 2024 – March 2026

GPA: 3.91

Relevant Coursework: Machine Learning, Deep Learning, AI, Web & Cloud Security, SQL

Experience

AI Engineer Intern

May 2025 – Aug 2025

T-Mobile

Bellevue, WA

- Engineered **prompt logic** guiding the AI through multi-step reasoning on account and plan inquiries, including a custom **tool** that calculated account tenure to dynamically surface onboarding content for new customers.
- Built and maintained an **LLM-as-judge evaluation pipeline** to score response accuracy against expected outputs, updated with every feature and gated before every production release.
- Built an internal **analytics tool** to mine **~1M customer conversations** for target behaviors, from known production bugs to recurring user patterns, giving the team visibility into real-world bot performance.
- Identified and resolved **15 bugs** spanning prompt logic and tool-call errors, including a critical defect impacting all **~150K daily conversations** before it shipped.

Team Lead – AI Fishbowl (Voice AI Platform)

Oct 2025 – March 2026

Portland State University Capstone

- Led a **6-person team** to ship a **real-time AI voice assistant kiosk** integrating STT, LLM reasoning, REST APIs, and edge hardware for live user interaction.
- Owned the end-to-end **event-driven pipeline** (audio ingestion → STT → intent routing → tool execution → response generation) with low-latency constraints.
- Drove **Agile delivery and CI/CD**, translating stakeholder requirements into production-ready services across frontend, backend, ML, and hardware.

Projects

Prep&Count: AI-Driven Fitness and Nutrition Platform | *React Native, Node.js, MongoDB, REST APIs*

- Built **backend services** for authentication, user profiles, and **personalized recommendations**, serving real-time mobile clients via **secure REST APIs**.
- Designed **data models** to automate tracking workflows and support **dynamic reporting** with low-latency updates.

Media Lens: News Coverage Explorer | *Python, FastAPI, SQL, Redis, Docker*

- Built a **full-stack analytics platform** for ingesting and querying **large article datasets** with complex filters and aggregations.
- Implemented **REST microservices** with **Redis caching** and **containerized deployment**, improving query latency and enabling concurrent access.

Skills & Certifications

Languages: Python, C++, JavaScript, SQL

AI/ML: OpenAI Agents SDK, LLM Integration, STT, NLP, Data Pipelines

Systems: REST APIs, Event-Driven Architectures, Real-Time Pipelines, Redis, Docker, CI/CD

Certifications: AWS Cloud Practitioner, Certified Scrum Product Owner (CSPO)
